

**NALT****NBI Liquid Alternatives ETF****Investment Objective**

The NBI Liquid Alternatives ETF's investment objective is to provide a positive return that exceeds the return of Government of Canada 91-day Treasury bills over a market cycle, regardless of prevailing market conditions or general market direction. The NBI ETF's secondary investment objective is to provide a lower volatility and a low correlation to the return of the major North American equity markets. The NBI ETF will seek to achieve this objective by investing primarily in long and short positions on financial derivatives that provide exposure to major asset classes such as government bonds, currencies, equities and commodities.

## NBI Liquid Alternatives ETF

### Disclosure

NBI ETFs are offered by National Bank Investments Inc., a wholly owned subsidiary of National Bank of Canada. Commissions, management fees and expenses all may be associated with investments in exchange-traded funds (ETFs). Please read the prospectus or ETF Facts document(s) before investing. ETFs are not guaranteed, their values change frequently and past performance may not be repeated. ETF units are bought and sold at market price on a stock exchange and brokerage commissions will reduce returns. NBI ETFs do not seek to return any predetermined amount at maturity. Index returns do not represent NBI ETF returns. The indicated rates of return are the historical total returns for the periods including changes in unit value and reinvestment of all distributions and do not take into account redemption, commission charges or income taxes payable by any unitholder that would have reduced returns. Past performance may not be repeated.
