## NBI Sustainable Canadian Corporate Bond ETF

### Investment Objective

The NBI Sustainable Canadian Corporate Bond ETF's investment objective is to provide a sustained level of current income and capital growth, with an emphasis on bonds issued by Canadian corporations with a carbon intensity substantially lower than that of the estimated carbon intensity of the ETF's benchmark, while considering ESG issues, climate risks and contribution to United Nations ("UN") sustainable development goals. It invests, directly or indirectly through investments in securities of other mutual funds, in a portfolio comprised primarily of bonds issued by Canadian corporations.

## NBI Sustainable Canadian Corporate Bond ETF

### Disclosure

NBI ETFs are offered by National Bank Investments Inc., a wholly owned subsidiary of National Bank of Canada. Commissions, management fees and expenses all may be associated with investments in exchange-traded funds (ETFs). Please read the prospectus or ETF Facts document(s) before investing. ETFs are not guaranteed, their values change frequently and past performance may not be repeated. ETF units are bought and sold at market price on a stock exchange and brokerage commissions will reduce returns. NBI ETFs do not seek to return any predetermined amount at maturity. Index returns do not represent NBI ETF returns. The indicated rates of return are the historical total returns for the periods including changes in unit value and reinvestment of all distributions and do not take into account redemption, commission charges or income taxes payable by any unitholder that would have reduced returns. Past performance may not be repeated.
