NBI Unconstrained Fixed Income ETF

Investment Objective

The NBI Unconstrained Fixed Income ETF's investment objective is to maximize total return, consistent with preservation of capital. The NBI ETF invests, directly or indirectly through investments in securities of one or many other mutual funds or through the use of derivatives, in a diversified portfolio composed mainly of fixed-income securities of issuers located throughout the world with various maturities and credit ratings.

NBI Unconstrained Fixed Income ETF

Disclosure

NBI ETFs are offered by National Bank Investments Inc., a wholly owned subsidiary of National Bank of Canada. Commissions, management fees and expenses all may be associated with investments in exchange-traded funds (ETFs). Please read the prospectus or ETF Facts document(s) before investing. ETFs are not guaranteed, their values change frequently and past performance may not be repeated. ETF units are bought and sold at market price on a stock exchange and brokerage commissions will reduce returns. NBI ETFs do not seek to return any predetermined amount at maturity. Index returns do not represent NBI ETF returns. The indicated rates of return are the historical total returns for the periods including changes in unit value and reinvestment of all distributions and do not take into account redemption, commission charges or income taxes payable by any unitholder that would have reduced returns. Past performance may not be repeated.
